

ASH GROVE CEMENT WEST, INC.

Inter-Office Memorandum

Date March 31, 1987

To Jim Post

From Ken Rone

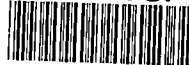

Copies to Erik Voldbaek

Subject Activity report
Week Ending 3/29/87

- 2/5/87 (1) Negotiations with Port of Seattle continue. If fence line can stay where it is, port will lease, buy or swap parcel granting us an access easement for the new gate to be installed in that area. They will have parcels in question appraised.
- 2/5/87 (2) Bi-Annual inspection by MSHA revealed no violations.
- 2/5/87 (3) Received "final" reclamation plan for Superior Quarry after initial draft was reviewed by all parties.
- 2/5/87 (4) Met with Weyco over revised lease proposal. Nearly all our demands were accommodated except two. I believe it to be the best deal and recommend signing it. Further negotiation would unnecessarily delay the project.
5. Visted by representatives of Chiyoda International. Their group is proposing to use a proprietary mix of blast furnace slag and cement for soils stabilization.
6. Sending 40% and 70% bricks to Inkom along with four rotary feeders.
7. Unusual overtime this weekend. Worked packing and loading C employee and supervisor both days to supply cement for RCC job.
- 2/5/87 (8) PSAPCA is having second thoughts on their proposed "special handling" of plant shutdown fugitive dust emission credits. Mr. Odell continues his negotiations.
- 2/5/87 (9) Office roof replaced. PSAPCA investigated complaint that roofing removed from building was asbestos containing. PSAPCA allowed work to continue. Complaint was registered by a competitive roofer.
10. Permitting process for Superior Quarry should conclude on October 5 provided we apply on April 1 and there are no objections during the process.
11. No accidents. Visitors: Mr. Mahorney.
